

THE AUBREY BARKER FUND

GOLDEN JUBILEE PRIZE

In celebration of 50 years of operation, the Aubrey Barker Fund is hosting the *Golden Jubilee Prize* to further raise awareness the survey and land economy professions and their contribution to a sustainable world.

The competition:

Applicants should produce a video clip of maximum 2 minutes duration that addresses the theme:

How can surveyors lead us into a sustainable future?

Submissions will be assessed against the following criteria:

- Extent to which the submission creates awareness of the surveying profession
- Extent to which the submission addresses *global sustainability needs*, in particular the needs of developing countries
- Demonstration of novel ideas, creativity and clear messaging

Submissions formats:

Send the YouTube link to view the video online **and** a link for the AVI / MP4 file download here: <https://bit.ly/3J84yy0>
Include the hashtags #AubreyBarkerFund and #ABFGoldenJubilee in the caption.

The prizes:

Thanks to the generous sponsorship of Leica Geosystems, the following prizes are on offer:

1. Overall First Prize – £500 donated by ABF plus a Leica prize which could be equipment or an internship, dependent on location and status of winners.
2. Special prize for most interesting entry from a country in the current list of World Bank low-income or low-middle-income economies supported by Leica.

Who should apply and how:

Entry is open to individuals and groups (of three students or less) enrolled in a survey, land economy or related degree at a higher education institution.

The deadline for submissions is June 13th 2022. Winners will be announced on July 31st.

For details of the competition, and of our grants, please visit our website aubreybarkergrants.org

About the ABF:

Established in 1972, the Aubrey Barker Fund is dedicated to enhancing sustainable survey and land management skills in developing countries through professional education and capacity building for the lasting benefit of local communities.

The Fund works to support the development of necessary survey and land management skills, and to ensure that they are available in all nations and communities; alongside encouraging and facilitating the sharing of these skills and knowledge with communities so that we increase our collective capacity to manage our key asset: our land.
