

## **SURVEY REVIEW CUMULATIVE INDEX**

### **Volumes 1-35**

#### **M-R**

- M.S.F. Standard Frequency Radio Time Signals. Uses of. in Astro-Survey Work. G. B. Tait. **126**, 374
- Macaulay, M. A., Oyeneye, G. A. and Bhong, M. B.* The Use of Global Positioning System for Primary Survey Control in Nigeria. **240**,107
- Macdonald, A. S.* A personal tribute to the Directorate of Overseas Surveys 1946-1983. **211**, 193
- Macdonald, A. S.* An Inexpensive Tower for Tellurometer Traverses. **121**, 129
- Macdonald, A. S. and Christie, R. R.* From Miles to Millimetres: The Story of Geodesy at Ordnance Survey 1791-1991. **241**, 126
- Macdonald, A. S.* Two Continents, One Meridian, Two Visionaries, One Goal. **275**, 307
- Macgillivray, J. W.* Trinidad and Tobago, 1936 to 31 March 1937. **27**, 299; **28**, 354
- Macgillivray, J. W.* Old Regulations in Trinidad. **21**, 396
- Macgillivray, J. W.* The Use of the Magnetic Needle on Surveys in Trinidad. **10**, 238
- Machine Method of Intersection. G. P. Rao. **9**, 166
- Mackereth, J.* A note on position fixing using hyperbolic navigation systems. **182**, 382
- MacLeod, M. N.* Survey in the Great War. **4**, 51; **5**, 207; **6**, 253
- MacLeod, M. N.* Rectification of Air Photographs. **48**, 59
- Madwhal, H.B. and Rajal, B. S.* Kinematic Global Positioning System Survey as the Solution for Quick Large Scale Mapping. **265**, 159
- Magnetic Compasses. Portable Standard. T. F. Connolly, **1**, 21
- Magnetic Needle on Surveys in Trinidad. The Use of the. J. W. Macgillivray. **10**, 238
- Malawi ?-Metrication-which way in. R. A. Minchell. **163**, 206
- Malaya and Siam. Geographical Positions in. A. G. Bazley. **30**, 450
- Malaya, Siam and India Triangulations. Connection of. B. L. Gulatee. **74**, 175
- Malaysia. A New Height Control for Peninsular. S. Ses and J. R. Gilliland. **265**'151
- Maling, D. H.* A Review of Some Russian Map Projections. **115**, 203; **116**, 255; **117**, 294
- Malpica, J. A. and Sevilla, M. J.* A Minimum Elastic Deformation Energy Projection. **271**, 56; **272**,1
- Management -a CASLE initiative. Land information. P. F. Dale. **228**, 263
- Management: a review of selected concepts and issues. Land information. J. McLaughlin. **222**, 381
- Mankin, J. H.* Middle East frontiers triangulation. **183**, 28
- Mankin, J. H.* Not in the Book: Reminiscences of Cadastral Surveying in Palestine 40 Years ago. **148**, 251
- Mankin, J. H.* Survey of the Old City of Jerusalem: 1865 and 1935. **150**, 338
- Manninen, T., Pontinen, P., Haggren, H., Perillilinen, I., Pesonen, J., and Rantasuo, M.* Airborne 3-D Profilometer. **259**, 325
- Manning, H. G.* Thailand and Australia cooperate to update Thailand's Land Titles System. **245**, 370
- Map Areas. A Rational Method to Calculate the Geometry of. Abdulla H. Sabtan. **258**, 270
- Map Construction. A Few Thoughts on. J. Robertson. **2**, 76
- Map Grid Co-ordinate Systems for Geodetic Network Adjustments. The Use of Geographic and. M. R. Shortis and J. W. Seager. **254**, 495

- Map Maintenance, Policy and Technique. M. O. Collins. **32**, 67
- Map mounting Machine. The Ordnance Survey. D. R. Martin. **1**, 15
- Map of Dominica, West Indies. Notes on the Names for the New. Douglas Taylor. **127**, 11
- Map of the Empire. A. G. T. M. **41**, 160
- Map of the World (I. M. W.) on the Millionth Scale, A Re-appraisal of the International. R. A. Gardiner. **120**, 54
- Map Projection Transformations on the Plane. Some Equivalent. O. M. Miller. **136**, 73
- Map Projections. On the Classification of. B. Goussinsky. **80**, 75
- Map Projections. Russian. A Review of Some. D. H. Maling. **115**, 203; **116**, 255; **117**, 294
- Map Projections. Some New Equal Area. W. R. Tobler. **131**, 240
- Map Projections. The Choice of. W. G. V. Balchin. **92**, 263
- Map Projections. The Nomenclature and Classification of. L. P. Lee. **51**, 190
- Map Projections. The Nomenclature of. L. P. Lee. **60**, 217
- Map projections. A note on conformal. E. H. Thompson. **175**, 17
- Map Projections. Nomenclature of. Sir G. P. Lenox-Conyngham. **53**, 276
- Map Reproduction in the Tropics. F. C. Blake. **20**, 347
- Map. A Model for the Transformation of Satellite Vectors to the Plane of the Inge Revhaug. **274**, 277
- Map-Grids. H. St J .L. Winterbotham. **20**, 322
- Mapping control by Doppler translocation. Heights above the geoid for. M. C. Breach and P. Maye. **230**, 363
- Mapping from Air Photographs. A Projection Method of. H. G. Fourcade. **35**, 270
- Mapping Mount Kenya. W. D. C. Wiggins. **94**, 338
- Mapping of Norway. A history of the survey and. I. F. G. Whittington. **197**, 291
- Mapping of Sixteenth-century Scotland: Survey or Chorography? Timothy Pont and the J. C. Stone. **276**, 418
- Mapping of the triaxial ellipsoid. Conformal. J. P. Snyder. **217**, 130
- Mapping organisation. The role of a national. A. G. Bomford. **195**, 195
- Mapping Out of Crown Lands in Ceylon. G. B. King. **83**, 194; **84**, 242
- Mapping. Photogrammetric. in South Africa. F. W. Marsh and W. C. Watson. **91**, 222
- Mapping Reconnaissance, from Trimetrogon Photographs in the Anglo-Egyptian Sudan. J. W. Wright. **79**, 2
- Mapping. Uncontrolled. from Air Photographs. R. W. Pring. **84**, 278
- Mapping. land tenure and remote sensing in development aid projects. Surveying. G. McGrath, F. P. Ruane and I. T. Logan. **229**, 311
- Mapping. Modern-Including the Employment of Radio Techniques and with Special Reference to Economic Development. C. A. Hart. **65**, 101
- Mapping. A Simple Way of Introducing a Global Reference Frame in Surveying and. B-G Reit. **264**, 87
- Mapping. Kinematic Global Positioning System Survey as the Solution for Quick Large Scale. B. S. Rajal and H. B. Madwhal. **265**, 159
- Mapping. The Slide-rule in Coast-Line. P. A. Clayton. **34**, 195
- Maps and Land Use. H. Biesheuvel. **102**, 342
- Maps. Survey Camp. Some Notes on the Making of Land Use. H. Biesheuvel. **90**, 159
- Maps. Topographical. The Accuracy of. D. R. Crone. **88**, 64
- Maps. Air. W. G. V. Balchin. **66**, 138
- Maps. Marginal Scales of Latitude and Longitude on Transverse Mercator. L. P. Lee. **60**, 220
- Maps. Adjustment of information digitised from. Y. Doytsher and B. Shmutter. **211**, 211

- Maps. Digitisation and Geometrical Improvement of Inhomogeneous Cadastral. D. Morgenstern, K. M. Prell and H. G. Riemer. **234**, 149
- Maré, W.* Notes on the Astronomical Triangle. **103**, 35
- Marginal Scales of Latitude and Longitude on Transverse Mercator Maps. L. P. Lee. **60**, 220
- Marsh, F. W. and Watson, W. C.* Photogrammetric Mapping in South Africa. **91**, 222
- Martin, D. R.* The Ordnance Survey Map-mounting Machine. **1**, 15
- Martin, D., Stewart, M. et al.* Traceability and the calibration of Satellite Positioning Systems. **269**, 437
- Martinod, I. et al.* Determination of Ground Displacements in the Seismic Zone of Volvi. Greece. **266**, 229
- Maseyk, J. and Hannah, J.* The Definition and adjustment of the Fiji Geodetic Datum - 1986. **231**, 33
- Mathematical Approach to Problems in Photogrammetry. A. G. B. Das. **73**, 131
- Mathematical Geodesy. Recent Symposia on. J. F. Bell. **139**, 228
- Mathematical Theory of the Transit Theodolite. J. Clendinning. **42**. 194; **46**. 462
- Mathematician and the Printer. The. **136**, 83
- Mather, R. S. and Fryer, J. G.* Geoidal studies in Australia. **156**, 268
- Mather, R. S.* Errors in Height Traversing with Reduction Tacheometers, **135**, 24
- Mather, R. S.* Residual Errors in Adjusted Sequences. **138**, 175
- Mather, R. S.* The Formula for Normal Gravity in Geodetic Calculations. **150**, 341
- Mather, R. S.* The Residual Error Distribution. **143**, 38
- Mathews, A. E. H.* Figurative photogrammetry. **179**, 201
- Matrices in rigorous re-adjustment of traverse networks. A method for overcoming some problems of ill-conditioned. U. Ethrog. **215**, 33
- Mauritius and Rodriguez. Geographical Positions in. A. G. Bazley **27**, 290
- Mavrellis, G. Stathas, D. and Arabatzi, O.* Testing the Digital Level Wild-NA 2000 in Laboratory and Field Conditions. **248**, 99
- Maxwell, P. S. E. :Echo Sounding. **17**, 131; **18**, 194; **19**, 266
- Maya, R. H. and Twigg, D. R.* Positioning Accuracy when using Theodolite External Optical Sights. **260**, 393
- Maye, P. and Breach, M. C.* Heights above the geoid for mapping control by Doppler translocation. **230**, 363
- Mc Villy, R. B.* Parabola as Transition Curve. **149**, 305
- McBean, L. M.* Notes on the Geodetic Survey of Southern Rhodesia. **35**, 275
- McBean, L. M.* Report of the Survey of Southern Rhodesia for 1941. **46**, 496
- McBean, L. M.* Some Comparisons between Theodolite observations and Target Rifle Shooting. **33**, 134
- McCaw, G. T.* The Late Capt. G. T. A Canadian Tribute. **48**, 95
- McCaw, G. T.* Correction to Bearing for Height of Signal. **48**, 57
- McCaw, D.* The State of North Borneo. **2**, 84
- McCaw's Contributions to the *E.S.R.*, The Late Captain. G. P. Lenox-Conyngham, J. Clendinning. **55**, 28
- McEwen, A. C.* Beating the bounds. **207**, 13
- McEwen, A. C.* Surveys in the Seychelles. **124**, 242
- McEwen, A. C.* The Metis Settlements Land Registry in Alberta. **256**, 77
- McGrath, G. (et al).* Surveying, mapping, land tenure and remote sensing in development aid projects. **229**, 311
- McLaughlin, J.* Land information management: a review of selected concepts and issues. **222**, 381
- McLean, R. E.* Accurate measurement by geodimeter: a practical application of the differential technique, **153**, 123

- McLintock, D. and Ashkenazi, V.* Very long baseline interferometry; an introduction and geodetic applications. **204**, 279
- McMath, J. R.* Canadian Cartography. **13**, 407
- McVilly, R. B.* An Adaptation of the Plane Mirror for use in Geodimeter Work. **142**, 359
- McVilly, R. B.* The Use of the Geodimeter on Routine Civil Engineering Projects. **138**, 146
- Meade, B. K.* Discussion of Results from the Bowring Formulas developed for Solutions of the Geodesic Inverse and the Great Elliptic Inverse. **261**, 477
- Mean Free-Air Gravity Anomalies by Bjerhammer's Deterministic and Collocation Methods over Scandinavia, Computation of. H. Nahavandchi. **278**, 513
- Mean Square Errors of Point Determinations. G. H. Menzies. **53**, 279; **54**, 314; **59**, 183
- Measured Angles and Measured Lengths in a Doubly-Braced Quadrilateral, adjustment of. G. J. Thornton-Smith. **131**, 236
- Measurement of Flexible Structures. A Preliminary Assessment of the Tellurometer MA 200 for Vibrational. T. J. M. Kennie, C. M. Howard and S. P. Horkan. **232**, 67
- Measurement of small movements in large structures. K. D. Robertson. **160**, 74
- Measurement of Temperature of Geodetic Surveying Tapes. J. S. Clark and L. O. C. Johnson. **89**, 110
- Measurement, Accurate, of Distances by High Frequency Light Variations. The Geodimeter : An Instrument for the, **85**, 290; **86**, 363
- Measurement. Distance. R.G.S. Discussion on the Tellurometer System of. **107**, 227
- Measurement. Distance. The Munich Courses in. R. L. Aston. **107**, 230
- Measurement, Distance. The Tellurometer System of. T. L. Wadley. **105**, 100; **106**, 146
- Measurement. A new approach to the problem of atmospheric correction in long distance E.D.M. J. T. Pinto. **224**, 69
- Measurement. Some tests of retro-reflective materials for electro-optical distance. T. J. M. Kennie. **207**, 3; **208**, 51
- Measurement. The concept of least count in. D. Jeyanandan. **218**, 196
- Measurements for the Construction of the Test Slab of the Laboratory of Reinforced Concrete Structures of the University of Thessaloniki. A. Badellas, G. Penelis and P. Savaidis. **238**, 404
- Measurements of Linear Features. A Note on Industrial. K. Kubik. **237**, 323
- Measurements. Surveying. Microclimatology and its Effects on the Accuracy of. D. O'Connor, **118**, 364
- Measurements. Refraction effects on vertical angle. A. H. Dodson and M. Zaher. **217**, 169
- Measuring the World Record Air Speed B. Watts. **105**, 127
- Meeting of Teachers of Surveying, Dec. 1967. D. J. Hodges. **148**, 277
- Meeting of Teachers of Surveying, December 1965. R. G. Bird. **141**, 327
- Meeting of Teachers of Surveying, December 1964. **137**, 141
- Mekometer III. EDM with sub-millimetre resolution. K. D. Froome. **161**, 98
- Mekometer III-the electronic principles of the. R. H. Bradsell. **161**, 112
- Mekometer ME 3000. On the accuracy and precision of the Kern. J. M. Rieger. **214**, 330
- Mekometer. A simple calibrator for the. R. H. Bradsell. **186**, 72
- Mekometer. III wavelength standard. Long term stability of an NPL. K. D. Froome and R. H. Bradsell. **186**, 166
- Mekometers. Some commercial surveys using prototype. P. F. Green. 173, 317

- Meldrum, D. R. and Reid D. L.* and: Survey and Setting-out of Townships and Town-planning Lay-outs. **13**, 395
- Melville-Richards, C. E.* Use of Survey Sections in Operations. **50**, 162
- Memorial service. Professor E. H. Thompson, **181**, 299
- Men and instruments. R. C. Cox, **188**, 243
- Mental Field Astronomy and Other Matters. H. A. L. Shewell, **128**, 58; **129**, 113
- Menzies, G. H.* Mean Square Errors of Point Determinations. **53**, 279; **54**, 314; **59**, 183
- Menzies, G. H.* A Commentary on Gauss's Tables. **118**, 374
- Menzies, G. H.* An anthology of Numerical Solutions of Simultaneous Linear Equations. **143**, 22
- Menzies, G. H. and Longley-Taylor, C.* A remote-controlled subtense bar. **154**, 170
- Menzies, G. H.* Directions and Angles in a Single Chain. **83**, 219
- Menzies, G. H.* Normal Equations Resolved by Approximation. **46**, 474
- Mercator for the Determination of the Distortions of the Image Formed by a Multiplex Projector, A. M. Wassef. **87**, 26
- Mercator Formulae. Transverse. J. C. B. Redfearn. **69**, 318
- Mercator Projection of the Spheroid Alternative to the Gauss-Krüger Form, A Transverse. L. P. Lee. **87**, 12
- Mercator Projection of the Spheroid, The Transverse. L. P. Lee. **58**, 142
- Mercator Projection. Minor Triangulation on the Transverse. H. F. Rainsford. **60**, 221
- Mercator Projection. The. and the Rhumb line. G. T. M. **19**, 289
- Mercator Projection. Transverse. J. E. Jackson. **188**, 278
- Meridian Arc. The Length of a. G. B. Lauf. **68**, 259
- Meridian. The African Arc of the 30th H. F. Rainsford. **82**, 159
- Meridian. Sir David Gill and the Geodetic Survey of Africa and the Arc of the 30th. J. Calder Wood. **48**, 50
- Meridians. The Convergence of. L. P. Lee. **61**, 267
- Meridians. 150 Years and 150. H. St J. L. Wnterbotham. **28**, 122
- Meridional distance problem for desk computers. T. Vincenty. **161**, 136
- Merry, C. L.* A note on geoidal heights in Southern Africa. **189**, 303
- Merry, C. L. and Rens, J.* Datum Transformation Parameters in Southern Africa. **236**, 281
- Merry, C. L. and Rüther, H.* Multipath effects at short ranges. **219**, 256
- Merry, C. L. and Whittal, J. F.* Transformation of Co-ordinate Data for the New South African Datum -a Pilot Study. **268**, 379
- Message, E. L., Iliffe, J. C. and Griffiths, W. J.* Localised Geoid Determination for Engineering Control Surveys. **275**, 320
- Methley, B. D. F. and Done, P.* The use of acrylic reflectors with electro-optical distance measuring equipment. **195**, 215
- Methley, B. D. F.* The Hewlett-Packard 3800B distance meter-a field evaluation. **174**, 337
- Method for Reducing Ground Swing on Tellurometer Measurements. A. J. Kelsey. **112**, 58
- Method for Resection Computation. A. K. R. Basu. **109**, 326
- Method of adjusting the optical plummet of the Wild T2. F. W. Jackson. **161**, 141
- Method of Booking and Reducing Traverse Angles. A. A. J. Rusk. **104**, 79
- Method of Determination of Astronomical Latitude and Longitude when only Time and Horizontal Angles are Observed. A. J. C. Bhattacharji. **110**, 352
- Method of Determining Astronomical Latitude from Observation of a Star-Pair near their Times of Elongation. A. J. C. Bhattacharji. **114**, 161
- Method of Determining Geodetic Azimuth and Deviation of the Vertical. A Practical. J. C. Bhattacharji. **112**, 71
- Method of Erecting High Signals. A Simple. J. E. S. Bradford. **67**, 226

Method of Observing Primary Horizontal Angles. A. J. E. S. Bradford. **67**, 222

Method of overcoming some problems of ill-conditioned matrices in rigorous re-adjustment of traverse networks. A. U. Ethrog. **215**, 33

Method of Solution of the Position Line Problem. A Proposed. G. B. Tait. **111**, 46

Method, A Resection. S. E. Evans. **89**, 126

Methodology for Benchmarking Real Time Kinematic GPS. A, S. J. Edwards, P.A. Cross, J.B. Barnes and D. Bétaille. **273**,163

Methods for under-water position-fixing by acoustics. Leung Kui-Wai and Lam Chi-Hung. **154**, 183

Meticulous measurements. T. Kitching. **208**, 62

Metis Settlements Land Registry in Alberta. The. A. C. McEwen. **256**, 77

Metre. The new definition of the. W. F. Price. **219**, 276

Metre-Foot Relation, The Cape Bar " A " and the. D. R. Hendrikz and P. M. Smuts. **75**, 202

Metres. The Two. the Story of an African Foot. G. T. M. **32**, 96

Metric camera imagery of Sudan. An evaluation of spacelab. L. J. Rackham. **224**, 55

Metrication-Which way in Malawi ? R. A. Minchell. **163**, 206

Metrology Networks in Three-Dimension. Adjustment of Precision. Xiaoli Ding and R. Coleman. **259**, 305

Metrology. A. N. Golubev and A.M. Chekhovsky. **268**, 350

Metrology. Ancient. E. N. R. Fletcher. **148**, 270

Metrology. Some Investigations into Interferometric Methods for Geodetic. A. N. Golubev and A. M. Chekhovsky. **268**, 350

*Mew. C. H.:* The Work of the Ordnance Survey of the Irish Free State. **3**, 131

*Mezera, D. F. and Lee, J-T.* Concerns related to GPS-derived Geoid determination. **276**, 379

*Mhlanga, A. and Greenway, I.* Recent Experiences in Developing Swaziland's Surveyor General's Department. **274**, 231

*Michalski, Z. M.* Notes on Traversing with Subtense Bar. **93**, 311

Microclimatology and its Effect on the Accuracy of Surveying Measurements. D. O'Connor. **118**, 364

Microcomputer. Efficient geodetic calculations by. R. J. Ord-Smith. **211**, 227

Microptic theodolite, watts ST300 series. J. R. Hollwey. **166**, 385

Middle East frontiers triangulation. J. H. Mankin. **183**, 28

*Middlemas, N. A.* Matang Base Line. **7**, 36

*Middlemas, N. A.* The Year 1934 in Sarawak. **18**, 248

*Middlemas, N. A.* Sarawak, Lands and Survey Department: Annual Report 1936. **25**, 177

*Middlemas, N. A.* Sarawak Survey Department: Triangulation Report. 1931-2, **7**, 34

*Milford, K. S.* A note on the calculation of the  $\chi^2$  and  $F$  statistics. **210**, 179

Military Survey Service and the Civilian Surveyor. The. R. C. A. Edge. **90**, 152

Military Survey, The School of, and its Courses for Commonwealth Surveyors. L. J. Harris. **73**,106

Military Survey. 1747-1997. 250 Years of. A. Gordon. **266**, 247

Military Surveyors in the World War, 1939-1945. Southern Rhodesian. J. E. S. Bradford. **62**, 282; **63**, 14

Military Surveys of the Last Fifty Years. Under Five Sovereigns, or. H. S. L. Winterbotham. **40**. 93

*Miller, A. W.* Surveys for Title. **28**, 332

*Miller, O. M.* Some Equivalent Map Projection Transformations on the Plane. **136**, 73

*Miller, P.* The 1979 Cambridge Conference of Commonwealth Surveyors. **196**, 249

- Mills, J. and Newton, I.* Surveying in Motor Sport. **254**, 485
- Minchell, R. A.* Metrication-Which way in Malawi ? **163**, 206
- Minghai Jia, Hui Qin, Xiaoli Ding and Jason Chao).* Variance Component Estimation for Recursive Least Squares Adjustments. **272**, 117
- Minimum Elastic Deformation Energy Projection (Parts 1 and 2). A, M. J. Sevilla and J. A. Malpica. **271**, 56; **272**, 109
- Minor Control Traverses in Rough Country, A Simple Form of Catenary Apparatus for. J. W. Wright. **70**, 344
- Minor Triangulation on the Transverse Mercator Projection. H. F. Rainsford. **38**, 481; **60**, 221
- Mirror in electro-optical distance measurement. The plane. A. L. Allan. **188**, 268
- Mitchell, A. P.* Land Registration in Buganda. **99**, 194
- Mitchell, A. P.* Survey of Palestine. The First Twenty Years. **45**, 388
- Mitsakaki, C. and Agatza-Baladimou, A. M.* Deformation studies of the Momos Dam area. **217**, 151
- Mitsakaki, C. and Agatza-Balodimou, A. M.* Effects of Systematic Errors due to the Non-coincidence of the Reference Surface with the Geoid for the Hellenic Region via Deformation Analysis. **232**, 51
- Model for a Four-Dimensional Regional Geodetic Reference Datum. A, F. W. O. Aduol. **264**, 91
- Model for the Establishment of an Integrated Regional Geodetic Datum. A, F. W. O. Aduol **250**, 213
- Model for the removal of drift from gravimetric data. Cascade. I. B. Osazuwa. **228**, 295
- Model for the Transformation between Satellite and Terrestrial Networks in Hong Kong. A. E. Mok. **244**, 344
- Model for the Transformation of Satellite Vectors to the Plane of the Map. A, Inge Revhaug. **274**, 277
- Model in the analysis of geodetic levelling: A new look at an old problem. The series of events. E. B. Ebong. **229**, 338
- Model Plane-Tabling. Sir C. Lewis. **60**, 214
- Modelling of the Atmospheric Refraction for Radio Waves. I. M. Ifadis. **236**, 259
- Modena. Determination of the secular movements of the axis of the civic tower at. P. Russo. **207**, 21
- Moderate and High Latitudes, Laplace points in. A. N. Black. **82**, 177
- Modern Influences on the University Aspect of Professional Training in Surveying. C. A. Hart. **69**, 282
- Modern Mapping-Including the Employment of Radio Techniques and with Special Reference to Economic Development. C. A. Hart. **65**, 101
- Modification of Bowditch's Rule to Preserve the Bearing of the Datum Line in a Closed Traverse. A. G. J. Thornton-Smith. **73**, 111
- Modified Meridian Distances in the Conical Orthomorphic Projection. The. J. Clendinning. **43**, 274
- Mohammed El-Tokhey and Hussein Abd-Elmotaal.* Effects due to Detection of Gross Errors in the Gravity Net in Egypt. **266**, 223
- Mohammed El-Tokhey and Hussein Abd- Elmotaal.* The role of the Geoid in Coordinate Transformation. **263**, 31
- Mohammed, W. R. (et al).* Combined solar ephemeris and azimuth program. **224**, 95
- Moho Depths versus Gravity Anomalies. Hussein Abd-Elmotaal. **273**, 175
- Mok, E.* 3-D Intersection applied to Verticality Checking. **237**, 311
- Mok, E.* A Model for the Transformation between Satellite and Terrestrial Networks in Hong Kong. **244**, 344

Monitoring Networks with Prior Deformation Information. Optimal Design of. Tao Benzao and Zhao Shaorong. **258**, 231

Monitoring observations- a particular case ? Movement evaluated by. R. Wood. **173**, 313

Moon, Surveys on the. A. E. Decae. **122**, 186

Moore, T. and Smith, M. J. Back to Basics. (8). **266**, 237; (11)/(12)Parts 1/2. **269**, 473; **270**, 509
